Pigeon Point Landfill - Proposed on NPL #6

Ken Kryszczun, Chief  
Site Investigation Section

Scott Parrish, Chief  
Hazard Ranking and Listing Branch

The Regional office would like to bring to your attention the State of Delaware's intention to resample the wells at the Pigeon Point Landfill. The attached letter from the State to Stephen Wassersug explains the State's position on the listing of the Landfill and the intent to resample.

The Delaware Solid Waste Authority submitted comments on the proposed listing which included documents indicating that the analytical data used to rank the site is suspect. The State supports a withdrawal of the NPL proposal and intends on resampling the wells to document that the original data used was inaccurate. Analytical services will be provided by a CLP laboratory to insure compliance with EPA protocol and methodology. The State will submit the results to EPA as late comments for consideration.

Should you have any questions, please contact [redacted] at FTS 597-0823.
